INP Reference

Global Mobility

LOCATION: worldwide

INDUSTRY BRANCH/TYPE OF PLANT: Transmission & Distribution, Large Plants, , Power Generation

Tasks

Support with the challenges in international projects.

Project description

International projects require international expertise. Specialization is particularly in demand in the field of tax and registration settlement in the respective countries of application. Due to the globalization of the INP Group with subsidiaries, affiliated companies, fiscal representatives and local registrations around the world, as well as the sound specialized knowledge of our tax and legal department (InTax team), we from INP can offer „compliance“ for global employee assignments. We know the characteristics and requirements of the international project business and, with our professional support for our customers, we can also offer a real added value in the administrative area. By setting up an internal INP integrity-team and the associated integrity-processes, we are in the position to offer global employee mobility as a full service.

INP Services

- Business premises development
- Development of international company and personal taxes
- International employee deployment
- Social security
- Visa and work permits
- Local content
- Procurement of rental housing
