Tasks

Evonik Steag GmbH is building a highly modern coal-fired power plant block in the 750 megawatt class at its Walsum site.

Project description

Not only does the power plant supply electricity, but also process steam for a nearby paper mill, and district heat. The new block will be the most modern coal-fired power plant in Germany when it is completed.

PERSONNEL PROVISION

- Monitoring and coordination of the work of subsuppliers
- Control of the schedule for setting up the cooling tower
- Welding monitoring and quality documentation in the area of the generator house/turbine, high-pressure pipelines inside and outside the boilers
- Commissioning support in the area of the control system P14
- Installation management in the area of heating, air conditioning and ventilation
