

### Rothensee – Waste Incineration Plant

**LOCATION:** Magdeburg, Germany (Saxony-Anhalt)

**SYSTEM/TECHNOLOGY:** ABB Symphony

**SERVICES:** Commissioning, Project management, Site management, Documentation, Detail engineering, Installation supervision

**INDUSTRY BRANCH/TYPE OF PLANT:** Power Generation, Waste incineration systems

**CLIENT:** ABB

**PROJECT SIZE:** EUR 800,000 (turn key)

#### Tasks

mhkw Rothensee GmbH, a joint venture of the Städtischen Werke Magdeburg GmbH (municipal utility company) and E.ON Kraftwerke GmbH, constructed a new waste-fueled power plant with electrical and controls systems from ABB.

#### Project description

The waste-fueled power plant is intended to burn non-recyclable trash from residential and industrial waste. The plant is laid out for a waste quantity of 300,000 tons annually, and has a capacity of 40 tons/hour with gross power generation of 32 MW.

#### INP Services

- Engineering of power plant control systems
- Engineering of boiler protection with Honeywell protection technology
- Software programming using the Composer engineering system
- Generation of wiring and cable routing documentation
- FT/FAT at in-house test facility
- Independent commissioning of controls systems
- Independent test operation
