# Your Career with INP

With us, you will hit the ground running!

GERMANY · SWITZERLAND · AUSTRIA · FRANCE · USA  
SOUTH AFRICA · BRAZIL · CANADA · MEXICO · EGYPT

## Who we are

INP International Projects is an independent and flexible technical service provider, as well as an independent partner to the energy sector and the large scale plant industry. This has been the case for more than 25 years now.

We are at home all over the world. Our offices are located in Germany, Switzerland, the USA, Austria, South Africa, France, Brazil, Canada, Mexico, and Egypt. All of them share one thing in common: the highest technical competence in the areas of process control engineering, automation systems, power technology/power transmission, distribution and conversion, machine and welding technology, thermal process engineering as well as construction and infrastructure projects. As an attractive employer, we currently have a workforce of more than 450 people.

Would you like to further your development, apply your skills successfully in a future-oriented team and work with plenty of self-responsibility? We offer many career opportunities – irrespective of whether you would like to start with us as a graduate or a specialist.

We owe our success to people who are constantly engaged in helping us grow. Therefore, the following characteristics are very important to us:

### **Respectful treatment**

This is particularly important to us. All employees and customers, regardless of nationality and origin, skin color and gender, are all treated the same by us.

### **Future**

We want to build our future with people from all over the world and different cultures.

### **Our Vision**

Be a part of new technologies and inventions. Bring your curiosity and expertise.

### **Responsibility**

In today's fast paced world quick decisions have to be made all the time. Each employee therefore has a responsibility to the company and his or her co-workers.

# Who we are looking for

## Career starters

We are looking for candidates who just finished their training or studies and would like to work in the field of electrical or mechanical engineering, control systems or in construction and infrastructure: We offer worldwide projects and numerous continued education opportunities.
